Hierarchical Inheritance.

Write a java program that creates a class named 'Employee' having the following members: Name, Age, Phone number, Address and Salary. It also has a method named 'printSalary()' which prints the Salary of the Employee. Two classes, 'Officer' and 'Manager' inherits the Employee class. The 'Officer' and 'Manager' classes have data members 'department' and 'Specialization' respectively. Now assign name, age, phone number, address and salary to an officer and a manager by making objects of both of these classes, and print the same.

Given – Officer & Manager inherits Employee class

∴ Hierarchical Inheritance ⇒

```
Class Employee {
 String name;
 int age;
 String phoneNumber;
 String address;
 double salary;
 Void printSalary() {
 System.out.println("Salary : " + salary);
 }
}
```

```
class Officer extends Employee {
 String specialization;
}
class Manager extends Employee {
  String department;
 }

Public class EmployeeMain {
Public static void main(String[] args) {
 Officer off = new Officer( );
 off.name = "Arjun");
 off.age  = 22;
 off. phoneNumber = "123456789";
 off. address = "ABC Villa";
 off. specialization = "AI-ML";
 off. salary = 40000;
 Manager man = new Manager( );
 man. name = "Akhil";
 man. age = 23;
 man. phoneNumber = "2468015432";
 man. address = "XYZ Nagar";
 man. salary = 55000
 man. department = "CSE";

 System.out.println("The Officer details are:");
 System. out. println("Officer's name:"+off.name);
System.out.println("Officer's age:"+off.age);
System.out.println("Officer's phnumber:"+
                                off. phoneNumber);
```

```
System.out.println("Officer's address :" +off.address);
System.out.println("Officer's Specialization:"+ off.
                                        Specialization);

off.printSalary();

System.out.println("The Details of Manager are:");
System.out.println("Manager's name:"+man.name);
System.out.println("Manager's Age:"+man.age);
System.out.println("Manager's PhoneNumber :"+
                                        man.phoneNumber);

System.out.println("Manager's Address :"+
                                        man.address);

System.out.println("Manager's department:"+man.depart
                                                ment);
man.printSalary();

}
}
```

Compile : javac EmployeeMain.java
Run : java EmployeeMain

OUTPUT

```
The details of Officer are:
Officer's name : Arjun
Officer's age : 22
Officer's phnumber: 123456789
Officer's address: ABC Villa
Officer's Specialization: AI-ML
Salary : 40000
```

The details of Manager are:

Manager's name: Akhil

Manager's Age: 23

Manager's Phone Number: 2468015432

Manager's address: XYZ Nagar

Manager's department: CSE

Salary : 55000
